How to test

EN | हिं

Use first morning urine when you can. Read the colour only after the wait time.

1 **Wash your hands** — About 30 sec

Wash with soap and water, then dry. Keep the strip bottle closed until you are ready.

2 **Collect midstream urine** — Sample

Start urinating, then catch the middle of the stream in a clean cup. First morning urine is best.

3 **Dip the strip** — 2 sec

Dip the pads for 1 to 2 seconds only. Do not leave the strip sitting in the cup.

4 **Wait, then place the strip** — 60 sec

Tap off extra drops. Lay the strip flat on the reading card under the holder.

I am ready, open camera

Back CR [number]

Pick the colour

Hold the strip next to the bottle chart after the wait time. Tap the box that matches the protein pad.

- ○ Negative
- ○ Trace
- ◉ 1+
- ○ 2+
- ○ 3+

Swatch colours are only a guide here. In the app the real chart on the bottle is the reference. This reading is saved as entered by hand.

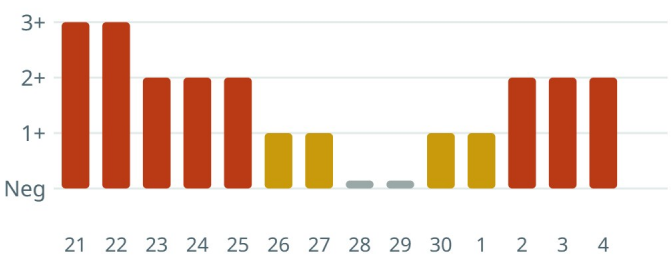

Save this grade

Dipstick | Docs | BP | Weight | Tre

Protein, last 14 days

Watch: 2+ for 3 days in a row

This can mean a relapse. Tell your doctor today. Your doctor can change this rule.

Negative | 1+ Watch | 2+ or more, Act

Days of 2+ or more	Last negative or trace
3	29 Sep

Yellow is 1+ and red is 2+ or more. Default rules: 2+ or more for 3 days in a row is a possible relapse. Negative or trace for 3 days in a row is a possible remission. The doctor confirms both.

Reminders

The phone rings at these times, even with no internet.

- [x] **Morning dipstick**
  8:00 am, every day
- [x] **Prednisolone 20 mg**
  8:30 am, every day
- [x] **Tacrolimus 1 mg**
  8:00 am and 8:00 pm
- [ ] **Blood pressure**
  Sunday, 9:00 am

Medicine times come from the checked prescription

Done

From your doctor

3 Oct, 6:40 pm New

Protein is staying high. Keep giving prednisolone as before. Bring the diary to the clinic on Tuesday.

28 Sep, 11:10 am

Check BP once a week while on tacrolimus.

Tests to get done

- [x] **Spot urine protein to creatinine ratio**
  Before Tuesday
- [ ] **Tacrolimus trough level**
  12 hours after the evening dose
- [ ] **Serum albumin**
  With the blood sample

Advice arrives when the phone next connects. Tick a test when it is done. Reports can be sent from Docs.
